Charging ⁶	Comfort	Design
Charging port	CCS2	
Max. AC charging power	11kW	
AC charging time (11kW 3-phase) 0-100%	6h 20min	6h 20min
Max. DC charging power	110	110
DC charging time SOC 10%-80%	35	
DC charging time SOC 30%-80%	28	

5. The WLTP range and consumption values are obtained under standard EU test conditions, according to the uniform provisions concerning the approval of motor vehicles with regard to the emissions based on the new World Harmonized Light Vehicle Test Procedure (WLTP). The actual range and energy consumption figures may vary due to a number of factors such as weather conditions, traffic situation, vehicle load and driving behaviours.

6. Charging times and charging speed may vary due to different factors such as battery temperature, specs of charging infrastructure, state of charge. A CCS2 DC charger with the output higher than 120kW and the voltage higher than 500V, as well as the suitable ambient temperature (25°C) are required to achieve the maximum charging speed.
